

Bright IT creates digital marketing solutions that help the Marketing, Sales, Communications and IT organisations of our international clients successfully connect with their customers, partners and associates.

If you are interested or already experienced in any of the following you should continue reading:

Java, Swift/Objective-C (OS X, iOS),
HTML/CSS, JavaScript, Python, Git,
Shell/Bash, Puppet

INTERNSHIPS / PERMANENT ROLES

IN WROCŁAW, POLAND

- **Backend Developer** has a focus on leading edge technologies combined with a dose of pragmatism to also step out of the comfort zone for instance to also tweak puppet.
- **Frontend Developer** not only creating decent CSS/JS/HTML5 based on frameworks like Bootstrap, AngularJS, or Less - but also not afraid of writing backend code or firing shell commands to get the job done.
- **DevOps Engineer** with a passion for automation (puppet, chef) combined with programming and debugging skills - wears sarcastic t-shirts.

Our work and team is very cross-functional - candidates that are a match across multiple of the above roles will particularly enjoy working with us. As anywhere else, you are expected to know English - you receive a salary bonus if you also know German. We invest in improving your language skills if you want.

WHAT TO EXPECT

- An above average salary and the joy of working in a great environment with top notch hardware (top shelf Macbook or similar).
- A small team spread across Poland and Austria where everyone matters and the possibility to work with clients from all over the world.
- Private healthcare insurance you can make use of after competing with us in go karts, sailing, skiing, mountain biking or other activities ;D

Our office is located in comfortable distance from university. If the above has caught your interest drop us an email at work@bright-it.com.
