

At Bright IT we focus on the end-to-end delivery of thriving digital experiences that help organizations of any size connect with customers, partners and associates. To strengthen our growing team the following full-time position is open for immediate hire:

DevOps Engineer / SysAdmin

Wroclaw, Poland

Responsibilities

- Setup and maintain our local IT infrastructure
- Manage web application environments for clients such as Bayer or Talanx
- Work hand in hand with experienced SysAdmins assisting with their infrastructure
- Document your work and existing environments
- Get up to speed with our preferred technology stack (Docker, Puppet, Ansible, AWS, vSphere, Vagrant, AMI Linux, RedHat, Windows, Varnish, Nginx, Tomcat, WildFly, Oracle, MySQL, Bash, PowerShell, ElasticSearch, Idol, Nagios, GitHub Enterprise, etc.)

Your profile

- Experience in managing Linux or Windows based servers
- Basic programming knowledge in Bash, python, ruby, or Java
- Good communication skills, proactive, systematic way of working
- English working proficiency
- German language skills and the willingness to travel are a huge plus

Our offer

- We support your initial and ongoing learning and personal development (conferences, seminars, certification)
- Competitive salary based on your personal skills
- Employee benefits (luxmed, gym membership)
- Highest quality work environment and hardware (Scrum, top spec Macbooks)
- The ability to further develop your role in a team of very talented professionals

Type of Hire: Fulltime
